New York, NY October 3, 2018 – Paradigm Spine, LLC, a leader in providing solutions for the treatment of lumbar spinal stenosis, today announced the issuance of a [Priority Health of Michigan Medical Policy](#). The policy, effective August 20 2018, now includes coverage of the coflex[®] Interlaminar Stabilization[®] device for lumbar spinal stenosis with no prior authorization required. This issuance adds to the continual growth of positive commercial payor policies for coflex[®].

Lumbar spinal stenosis (“LSS”), affecting 1.6 million patients annually, is a debilitating and degenerative disease in older patients (>50 years) often associated with significant leg and back pain, leg numbness and weakness, causing a significant reduction in an active lifestyle. Traditional surgical treatment options for LSS includes a decompression that removes bone and soft tissue and may also require a fusion to stabilize the spine. The coflex[®] device is a non-fusion, motion-preserving stabilization implant, that is FDA PMA-approved for the treatment of lumbar spinal stenosis and is used in conjunction with a decompression, or used in lieu of a spinal fusion.

Marc Viscogliosi, Chairman & CEO of Paradigm Spine, said, “This coverage policy by Priority Health of Michigan reflects the continued adoption and understanding of the benefits coflex[®] offers patients with lumbar spinal stenosis. We look forward to expanding patient access to the coflex[®] technology to the more than 786,000 lives covered by Priority Health of Michigan – Michigan’s second largest health plan that is nationally recognized for improving the health and lives of the people it serves by providing quality care that’s accessible and affordable.”
